

No. of Functional Features Included in the Solution

Date	30 September 2026
Team ID	SWTID-2026-9716
Project Name	Weather-Wise
Maximum Marks	5 Marks

Functional Features Overview:

This document lists the functional features included in the Weather-Wise solution. Each feature is described with its purpose, implementation status, module, and contribution.

Functional Features

S.No	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	User Registration	Allows new users to create an account using their details.	Auth Controller / User Model	Done	Core
2	User Login & JWT	Checks login details and generates a JWT token for authentication.	Auth Controller / Middleware	Done	Core
3	MongoDB Database	Stores user information and required application data.	MongoDB / Mongoose	Done	Core
4	Weather API	Gets weather details such as temperature, humidity, wind speed, and condition.	Weather Controller / API Service	Done	Core
5	AI Weather Recommendation	Provides useful recommendations based on the weather information.	AI Controller	Done	Core
6	AI Weather Summary	Generates a simple summary to make weather information easier to understand.	AI Controller	Done	Supporting
7	API Routes & Controllers	Handles requests through separate routes and controllers for each feature.	Express Routes / Controllers	Done	Core
8	Error Handling & Security	Handles invalid requests and protects restricted routes using authentication middleware.	Middleware / Controllers	Done	Supporting

Feature Summary:

Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	User interaction with the application	Registration, login, city search, weather display
2	Backend / Logic	4	Authentication, routes, controllers, AI processing
3	Database / Storage	1	MongoDB with Mongoose
4	API / Integration	2	Weather API, AI feature integration
5	Security / Authentication	2	JWT authentication, protected routes
