

Project Executable Files

Date	30 September 2026
Team ID	SWTID-2026-9716
Project Name	Weather Wise
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

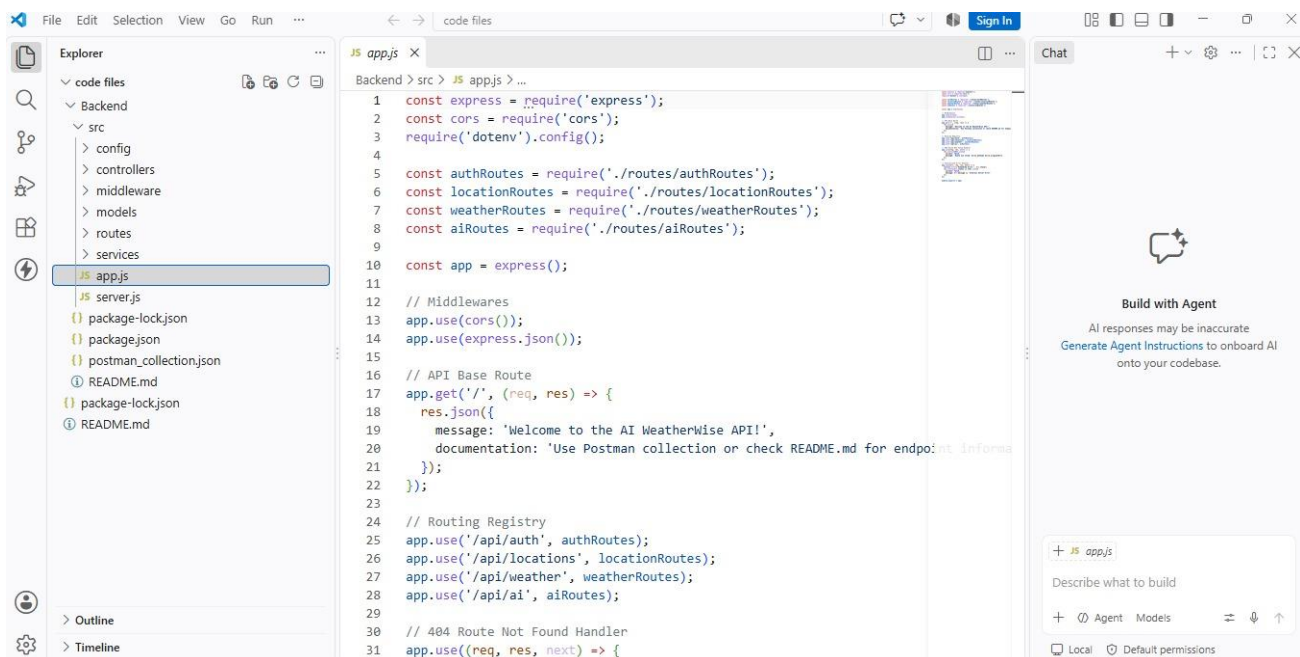

Step 1: Submission Checklist

S. No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example similar) or	Yes
6	Deployed application URL (if hosted)	NA[https://github.com/SwethaBalu2007/AI-WeatherWise-API]
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA

9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://github.com/SwethaBalu2007/AI-WeatherWise-API
Login Credentials (Demo)	Username: amohamedirfan005_db_user Password: 9SIYFhzgM9GUvEY
Platform / Hosting Provider	Render
Repository Link	https://github.com/SwethaBalu2007/AI-WeatherWise-API

Demo Video Link	https://drive.google.com/file/d/1T9ISUC3i7RtjQG-NMM25Ll3gFAFuQHUL/view?usp=drive_link
------------------------	---

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Download or clone the Weather-Wise project.
2. Open the project folder in VS Code.
3. Install the required dependencies.
4. Create the .env file using. env.example.
5. Add the required weather API key.
6. Start the backend server.
7. Start the frontend application.
8. Open the provided local URL in a browser.
9. Search for a city or allow location access.
10. View the current weather and forecast.

Step 5: Known Issues / Limitations

S. No	Known Issue / Limitation	Workaround / Status
1	Weather information depends on the availability of the weather API	Check API connection and key
2	Weather data may take some time to load depending on internet speed	Ensure a stable internet connection
3	Location-based weather requires location permission	Allow location access or manually search for a city
